

Auditmetrics®

Professional Version:

[Download Pro V7](#)

To order Pro V7 a Microsoft account is required. You may already have one if you made purchases such as MS Outlook. If not, you can create one.

After downloading Auditmetrics Pro V7, go back to the website and click on the YouTube icon  which will call up the Video Library and self-learning Modules.

Auditmetrics AI is designed to prepare businesses for the onslaught of DOGE type AI auditing. We use DOGE as a generic term which refers to the combination of state, federal and big business control. The best protection is to periodically monitor foundational operational data with the assurance of meeting IRS and AICPA standards.

[Auditmetrics was developed in a regulatory environment.](#)

Operational Level - takes raw unprocessed data structured into useful information for answering basic questions such as "who," "what," "when," and "where". The fertile ground for AI.

Tactical Level - is the result of analyzing and interpreting information to uncover patterns, trends and relationships for understanding how and why.

Strategic Level - the ability to make well informed decisions based on underlying knowledge but in the context of constantly trying to understand the flow of societal and economic trends. WISDOM ????
